

Spending Spree Activity

Let's pretend to have a fun day at the mall! You've each got \$30 to spend. There are five stations set up for you. Some have cool things to buy, such as music and jewelry, and some have delicious food and snacks. As you make purchases, keep track of how much you've spent and how much you have left. You might have to make some tough choices, such as deciding which is the better buy—a bracelet or a taco lunch. Feel free to help one another make those decisions, just as you do when you're really shopping with friends.
